

Leibniz-Institut
für Naturstoff-Forschung und Infektionsbiologie e.V.
Hans-Knöll-Institut (HKI)

Job Advertisement No. 18/2009

The Leibniz Institute for Natural Product Research and Infection Biology – Hans Knöll Institute – investigates the pathobiology of human-pathogenic microorganisms and identifies targets for the development of novel natural product-based antibiotics (www.hki-jena.de). We invite applications for

2 Postdoctoral positions (two years initially).

Successful candidates will work on analytical and functional studies on **single nucleotide polymorphisms / mutations** in hosts or pathogens which play a key role in infection diseases.

Requirements: We are looking for molecular biologists with strong background in molecular genetics, especially SNP and mutation analysis, microarray technology using short oligonucleotides for SNP and mutation analysis. Applicants should have a doctoral degree in biology or life sciences. Fluent English language skills are required.

Salary is paid according to German TV-L.

The Hans Knoell Institute is an equal opportunity employer.

Further information:

Prof. Dr. Hans Peter Saluz, +49 (0) 3641 532 1200, hanspeter.saluz@hki-jena.de

Complete applications should include a CV, list of publications, brief statement of research experiences, the names of three references and should be submitted referring to HKI **job posting No. 18/2009** by **September 30, 2009** to:

jobs@hki-jena.de
