The Medical Mycology Course will be held in Chengdu City, Sichuan province (West China) from March 30-April 4, 2011, with the title of “Fungus Diseases: Technical, Clinical and Research”. This is the 12th annual course authorized by National Continue Medical Education Committee of China, and, is in charged by Dr. RAN Yu-ping, Professor of West China University, Sichuan University. The registration day is March 30, 2011, and formal start at 8:00 AM, March 31, 2011. The course covers 5 full days of big class lecture, and, 4 nights of group lab experiment. After passed the final examination, the participants will get the academic diploma. The cost for this course is 700 RMB (about 100 US dollars), which only for the expenditure of teaching materials, not including the travel, board and lodging. The hostel is the Guest Hotel of Adult Continue Education College, Sichuan University, located in No.16, the 3rd section of Chengdu People’s South Street (Renmin Nanlu), with 2-bed room, cost 100 RMB per night.

Invited lecturers will include:

Liao Wanqing, Academician of China National Engineering Resarch Institute and Prof. of the Department of Dermatology, Shanghai Changzheng Hospital, The Second Military Medical University, China. His topic is: Investigation and application of pathogenic fungi.

XI Li-yan, Prof. of the Department of Dermatology, the Second Hospital of Sun Yat-sen, Zhongshan University, Guangzhou, China. Her topics include: 1) The progress of experimental technology in medical mycology; 2) Penicilliosis and Histoplasmosis; 3) Early diagnosis of deep fungal infection; 4) New opportunistic mycoses occurring in China.

RAN Yu-ping, Prof. of the Department of Dermatology, West China Hospital, Sichuan University, China. His topics include: 1) Classification and denomination of fungi; 2) Guides for a mycology laboratory; 3) Invasive mycoses involving different clinical departments; 4) The epidemiology and experimental diagnosis of onychomycosis; 5) Malassezia species and related diseases; 6) Sporotrichosis, Fusariosis, Chromomycosis and Blastomycosis; 7) Mycoses in children.

WEN Hai, Prof. of the Department of Dermatology, Shanghai Changzheng Hospital, The Second Military Medical University, China. His topics include: 1) The diagnosis and treatment of Cryptococcus; 2) Chinese Journal of Mycology and the guidelines for authors.

LI Ruo-yu, Prof. of the Research Center for Medical Mycology, the First Hospital of Peking University, China. Her topics include: 1) Diagnosis and treatment of deep fungal infections in China; 2) Applications of molecular biology technique in the field of medically important fungi; 3) Black yeasts and related fungi; 4) Antifungal susceptibility testing.

Liu Wei-da, Prof. of the Research Center for Dermatology, Medical Institute of Nanjing, China. His topics include: 1) The identification of dermatophyoses; 2) The identification of clinically important yeasts; 3) Diagnosis and treatment of vulvovaginal candidosis; 4) Hyalohyphomycosis.

HAO Fei, Prof. of the Department of Dermatology, Southwest China Hospital, and the Third Military Medical University, Chongqing, China. His topics include: 1) Epidemiology of systemic fungous infection; 2) Non-culture test in Lab. for invasive pulmonary aspergillosis.

Li Dongming, Prof. of the 3rd hospital, Research Center for Medical Mycology, Peking University, China. Her topics include: Trends in diagnosis and treatment of deep fungal infections.

LUO Han-chao, Prof. of the Department of Dermatology, West China Hospital, Sichuan University, China. His topic includes: The application of antifungal drugs.
WANG Lin, Prof. of the Department of Dermatology, West China Hospital, Sichuan University, China. Her includes: Clinical and pathological analysis of difficult mycoses.

Early registration for this course is now open and it is hoped many colleagues join us for lectures or sharing. Person who want to attend this course please finish the attached Registration Form and send Prof. RAN Yu-ping: ranyuping@gmail.com.
