CURITIBA, BRAZIL

16-18 November 2017

Managing Fungal Infections
in Latin America
Promoting Science and Innovation

Dear colleagues, partners, sponsors and friends,

It is our great pleasure to welcome you to Curitiba for the 15th edition of INFOCUS, the most comprehensive forum on Clinical Mycology for Latin America.

First of all we would like to thank our friends from ISHAM (International Society for Human and Animal Mycology) and ICHS (International Immunocompromised Host Society) who accepted to establish a partnership for excellence with INFOCUS, giving support to our scientific program. This initiative will certainly contribute to increase the interaction between both societies and leaders of Medical Mycology from our region.

Another important initiative of INFOCUS-2017 was to host a workshop coordinated by the CDC-Atlanta, USA, PAHO and several leaders from Latin America to discuss best strategies to monitor antifungal resistance in our region. In parallel, we will also have a meeting coordinated by Associação Panamericana de Infectologia-API to discuss some initiatives for improving the clinical management of fungal infections in Latin American medical centers.

Finally, we are in debt with all speakers from different countries who agreed to collaborate with our scientific agenda, and came to Curitiba to interact with our audience. In order to address major topics related to the clinical management of fungal infections in adult and pediatric populations we will count on 53 speakers from 12 countries who will deliver a total of 120 talks.

For all of you who kindly came to attend INFOCUS, be sure that our organizing and scientific committees did all efforts to provide you an enjoyable meeting for discussion of hot topics in clinical mycology.

Welcome to Curitiba and enjoy the 15th Edition of INFOCUS!
